Applicant's arguments with respect to claims 1, 6, 9, and 9 have been considered but are moot in view of the new ground(s) of rejection.

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 6, 8, and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Lin et al., U.S. patent # 6,340,734.

Although the bulk of Lin's disclosure is directed to silsesquioxane polymers wherein aromatic ring bearing an alkali-soluble group is bonded to silicon via a C<sub>2</sub> or higher alkyl, it is nonetheless, now observed that an equivalent polymer is described in column 8, lines 55-57 as an alternative to the novel polymers that represent Lin's invention. Of course, hydroxybenzylsilsesquioxane/phenylsilsesquioxane copolymers having a molecular weight similar to that of the aforementioned inventive silsesquioxane would be desired (column 6, lines 7-10) as would a similar ratio of the units carrying alkali soluble groups to those devoid of alkali soluble groups (column 6, lines 5-7).

Claims 1, 6, 8, and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by applicant's apparent admission that this polymer had already been taught in Japanese Patent no. 2567984. See the details under the heading, "Preparation Example" and the first paragraph under "Example 1". (It is conceived that, in fact, the patent only provides mention of a similar synthetic approach, but using different monomer materials. The

Examiner has requested a copy of this document and will have its contents translated so as to confirm the validity of this rejection.)

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marc S. Zimmer whose telephone number is 571-272-1096. The examiner can normally be reached on Monday-Friday 8:00-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Randy Gulakowski can be reached on 571-272-1302. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
